RIDE-ON SWING CAR

WARNING!

SMALL PARTS - Choking and suffocation hazard. Not recommended for children under 36 months.

WARNING!

ADULT ASSEMBLY REQUIRED
- Keep away from children until assembled.

Model no: 8821 | Batch no: PR4004

Please read and retain these instructions for future reference.

The illustrations used in this manual are to illustrate the operation method and structure of the product. Where there is a small difference between the physical item and the illustrations, please take the physical as the standard.

FEATURES:

Safe & stable

Low centre of gravity

Durable material

Indoor or outdoor play

No batteries, gears or pedals

HOW IT WORKS:

1. Place the ride on swing car onto a smooth, flat surface.
2. Sit with the feet on the footrests. Lean slightly forward and grip the steering wheel.
3. To propel the car forward, turn the steering wheel back and forth continuously. To go in reverse, rotate the steering wheel 180 degrees.
4. To bring the ride on swing car to a stop, stop turning the wheel, wait for the car to slow, and come to a stop.

SAFETY INFO:

1. When unpacking the ride on swing car, properly dispose of all plastic wrappings.
2. Adult supervision is required at all times.
3. Failure to follow the instructions may affect the safety of children.
4. This product is designed for use by children from 3 years to 6 years of age.
5. Protective equipment such as a helmet is recommended (protective equipment is not included).
6. Assembly must be completed by an adult.
7. Each time before use, ensure that all removeable parts and fasteners are firmly in place.
8. Only one child can use this at a time.
9. A child who is riding is not to be pushed.
10. Do not allow a child to stand on the ride-on.
11. Do not let children ride in the street, anywhere dangerous including stairs, doorsteps, steep slopes, streets/roads, vehicle traffic, next to bodies of water and away from other obstacles. Use during day light hours or in an illuminated area is advised to avoid accidents in the dark.
12. Do not drive on long or wet grass, mud, soft ground, gravel or sand.
13. It is not recommended for use on wooden floors. The wheels may damage some floors.
14. The maximum carrying capacity is 30kg.

ASSEMBLY:

Included parts:

Also included: 1 x shaft, not pictured. The shaft will be placed through the steering wheel and then threaded through the square tube during assembly.

1. Foam sleeve is placed between the top and base of the swing car. Ensure it marries up with the holes between the top and base of the swing car.
2. The square tube is then threaded through the hole on the top of the body, through the foam sleeve and the hole on the base of the swing car.
3. Thread the shaft through the steering wheel. The end with the thread for the nut on it is the end which goes through the hole. There is a notch on the other end which will stop it going through the hole on the steering wheel.
4. Feed the shaft through the already positioned square tube. The end of the shaft with the thread for the nut on it will come out through the underside of the body of the swing car.
5. Add the front wheels to the shaft and the square tube from the underside of the swing car. Ensure the smaller of the front wheels will face the front of the body.
6. Add the washer and then secure the nut.
7. Add the cap into the centre of the steering wheel.

8. Add the rear wheels to the body of the swing car.

Fit the notch on each wheel housing into the body. Push the wheels in at a 45 degree angle. When installed correctly, the rear wheel flare out from the body.

Warning: The rear wheel housing can not be removed once locked into place.

Strike the rear wheels with a rubber mallet (not included) to secure them in place.

TROUBLESHOOTING:

The rear wheels may detach from their housing if the ride on swing car is subjected to overloading or impact. Fit the wheel into their housing so that the flat sides of the white clips contact the wheel housing. Snap the wheel back into place.
